PERSONAL PROJECTS *(adnanaazad.github.io)*

POKEDEX | ReactJS • JavaScript ES6 • HTML5 • CSS3 • RESTful API • Bootstrap4

- Developed and designed a **single page interactive web application** using **React.js, JavaScript ES6, HTML5, CSS3, & Bootstrap4** to showcase the collection of fictional 151 pokemons that the user can interact with to learn more about a certain pokemon. This was done by utilizing **REST API** calls to a pokemon database.

SPACEX API | ReactJS • JavaScript ES6 • HTML5 • CSS3 • RESTful API • Bootstrap4

- Developed and designed a single page web application using **React.js, JavaScript ES6, HTML5, CSS3, & Bootstrap 4** to showcase SpaceX starship launch data by using **REST API** calls to collect launch data from their webpage.
- The single page web application showcases launch date and time, ID number of the starship launch, and the trajectory and destination of the launch.

SNAKE GAME | JavaScript ES6 • HTML5 • CSS3

- The classic game of snake developed using **JavaScript ES6, HTML5, CSS3** that utilizes **Multi-Dimensional Arrays, Object-Oriented Programming(OOP)** and simple gaming concepts to design a web browser based game of snakes.
